

GEMS ROBOTICS

Charyl Stockwell Preparatory Academy * 1032 Karl Greimel Dr, Brighton, MI 48116

Dear Potential Sponsor,

Thank you for your consideration of potentially supporting our students in pursuit of their engineering and business success through becoming a sponsor of our school district's robotics program.

Charyl Stockwell Academy School District is a K-12 charter school district with three campuses in Howell and Brighton, MI. The primary source of funding for our robotics program is through generous sponsors like yourself! We have a variety of sponsorship levels attached to for your review. We would love to partner with your and to promote your business in appreciation of your support of our students.

If you are not familiar with our high school robotics program our team is the CSPA Gems (FRC #4362). Each January, FIRST Robotics gives students a new game challenge and teams have approximately 8 weeks to design & build a unique robot to compete in those challenges. We then compete February-March to put their design and teamwork to the test. These competitions are attended by thousands of spectators. Our students find a home within our robotics program, and learn life long skills to accomplish their team's goals on an abbreviated deadline.

Despite our limited resources, our school district has excellent teams who has had great success over the past ten years. Due to our committed students and mentors our team regularly qualifies for the state competition, and we have competed in the World Competition numerous times over the past 5 years. In fact the GEMS won the state title in 2019! The Gems have an established footprint in robotics and are enthusiastic about promoting our sponsors during our events.

With your help, Triple S Boosters-Robotics Division can reach their goal of continuing to inspire the next generation of STEM professionals!

Every donation is tax deductible as Triple S Boosters is a 501(c)3 nonprofit organization (EIN#: 27-2866259). Please open the below attachment for more details on how you can support our team.

Thank you very much! Your donation is greatly appreciated!

Sincerely,

Liz Holland
